

# Radio Central Amateur Radio Club Special Event

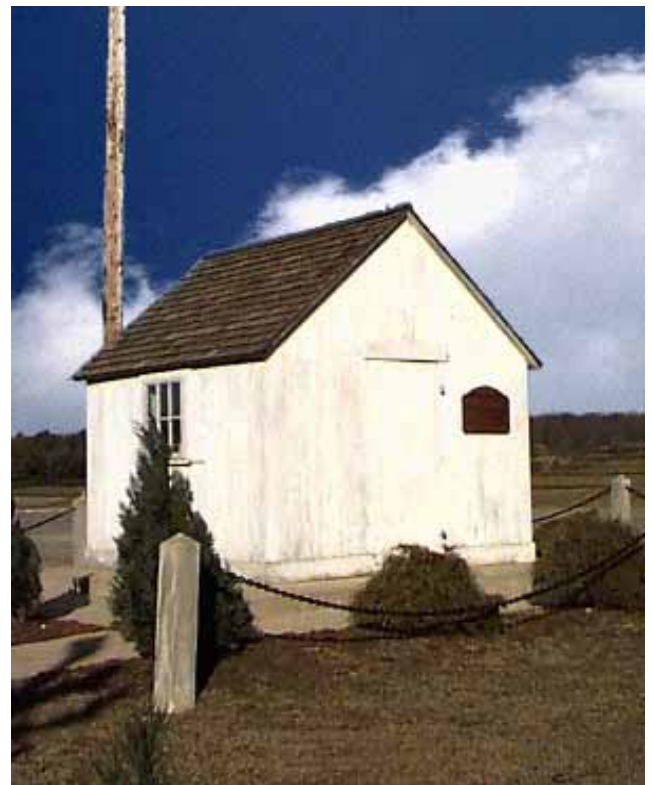

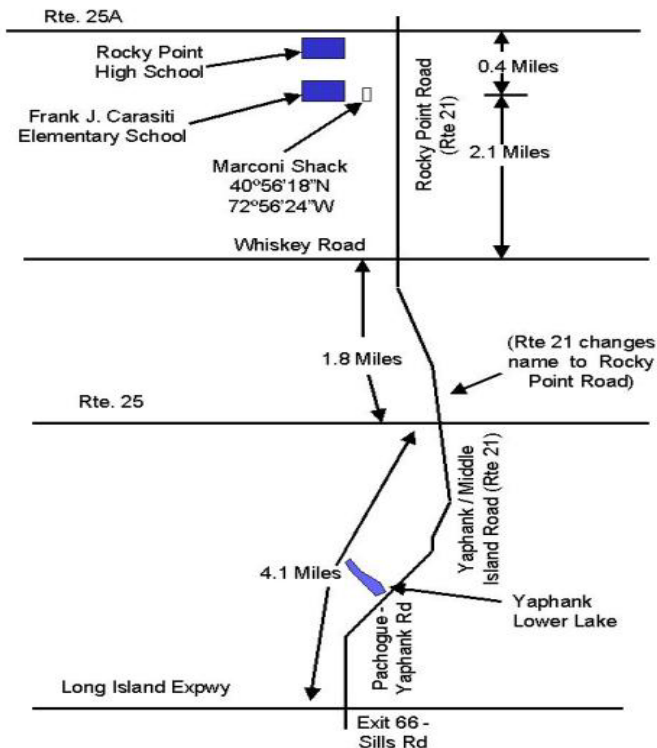

*Members of Radio Central Amateur Radio Club will activate the Marconi Shack in Rocky Point to commemorate an historic milestone in wireless communication history.*

*On November 5, 1921, President Warren Harding pressed the button to start the mighty generators at RCA's Radio Central Transmitting Site in Rocky Point, New York as Radio Central transmitted its first transatlantic radio message.*

*The Marconi Shack, located in front of the Carasiti Elementary School in Rocky Point, will come to life once again on November 5, 2005, from 10:00 AM to 3:00 PM, as local Ham Radio operators talk to the world from the W2RC Amateur Radio special event station.*

How to Get to the Marconi Shack

*Anyone interested in Amateur Radio is welcome to pay us a visit at the Marconi Shack on November 5, ask questions, and join us in celebrating Long Island's rich history in the pioneering of radio communication.*
